

INSTALLATION SHEET

Attic Application (Over Attic Floor)

PRODUCT: Perforated Radiant Barrier

Benefits:

- Quick, clean and easy to install
- Reduces heat loss in the winter and heat gain in the summer
- Unaffected by condensation and humidity
- Saves energy and money

Installation Method:

1. Always use caution when working in the attic. Be careful of your step and lay walking boards across the attic floor framing to safely walk across.
2. Measure the length and width of your attic floor.
3. Cut the sheets of Perforated Radiant Barrier in a large secure area before taking them to the attic for installation.
4. Once in the attic, roll the sheets out across the attic floor and over any existing insulation.

Not: Be sure to use the Perforated Radiant Barrier for adequate ventilation of moisture vapor.
