

INSTALLATION SHEET

Stud Walls

PRODUCT: Double Bubble Foil/Foil Insulation

Benefits:

- Quick, clean and easy to install
- Strong and lightweight
- Provides reflective barrier against heat gain or loss
- Excellent vapor barrier
- Unaffected by moisture and humidity

Installation Method:

Using the pre-cut 16" or 24" Reflective Bubble Insulation, roll out vertically between studs.

Staple the tabs on each side to wall studs, being sure to leave a 1" to 2" air space between the outside wall and the insulation.

Install drywall or paneling as typically installed, again making sure there is a 1" to 2" air space between insulation and drywall/paneling.
